MODULE

PROGRESS

	<div>Introduction to Academy</div> <div>8 Sections Fundamental General</div> <p>This module is recommended for new users. It allows users to become acquainted with the platform and the learning process.</p>	<div>100% Completed</div> <div></div>
	<div>Learning Process</div> <div>20 Sections Fundamental General</div> <p>The learning process is one of the essential and most important components that is often overlooked. This module does not teach you techniques to learn but describes the process of learning adapted to the field of information security. You will learn to understand how and when we learn best and increase and improve your learning efficiency greatly.</p>	<div>100% Completed</div> <div></div>
	<div>Linux Fundamentals</div> <div>30 Sections Fundamental General</div> <p>This module covers the fundamentals required to work comfortably with the Linux operating system and shell.</p>	<div>100% Completed</div> <div></div>
	<div>SQL Injection Fundamentals</div> <div>17 Sections Medium Offensive</div> <p>Databases are an important part of web application infrastructure and SQL (Structured Query Language) to store, retrieve, and manipulate information stored in them. SQL injection is a code injection technique used to take advantage of coding vulnerabilities and inject SQL queries via an application to bypass authentication, retrieve data from the back-end database, or achieve code execution on the underlying server.</p>	<div>35.29% Completed</div> <div></div>
	<div>Web Requests</div> <div>8 Sections Fundamental General</div> <p>This module introduces the topic of HTTP web requests and how different web applications utilize them to communicate with their backends.</p>	<div>100% Completed</div> <div></div>
	<div>Introduction to Networking</div> <div>21 Sections Fundamental General</div> <p>As an information security professional, a firm grasp of networking fundamentals and the required components is necessary. Without a strong foundation in networking, it will be tough to progress in any area of information security. Understanding how a network is structured and how the communication between the individual hosts and servers takes place using the various protocols allows us to understand the entire network structure and its network traffic in detail and how different communication standards are handled. This knowledge is essential to create our tools and to interact with the protocols.</p>	<div>100% Completed</div> <div></div>

## Introduction to Active Directory

### Introduction to Active Directory

16 Sections Fundamental General

Active Directory (AD) is present in the majority of corporate environments. Due to its many features and complexity, it presents a vast attack surface. To be successful as penetration testers and information security professionals, we must have a firm understanding of Active Directory fundamentals, AD structures, functionality, common AD flaws, misconfigurations, and defensive measures.

100% Completed

## Introduction to Web Applications

### Introduction to Web Applications

17 Sections Fundamental General

In the Introduction to Web Applications module, you will learn all of the basics of how web applications work and begin to look at them from an information security perspective.

100% Completed

## Getting Started

### Getting Started

23 Sections Fundamental Offensive

This module covers the fundamentals of penetration testing and an introduction to Hack The Box.

100% Completed

## Intro to Network Traffic Analysis

### Intro to Network Traffic Analysis

15 Sections Medium General

Network traffic analysis is used by security teams to monitor network activity and look for anomalies that could indicate security and operational issues. Offensive security practitioners can use network traffic analysis to search for sensitive data such as credentials, hidden applications, reachable network segments, or other potentially sensitive information "on the wire." Network traffic analysis has many uses for attackers and defenders alike.

33.33% Completed

## Setting Up

### Setting Up

9 Sections Fundamental General

This module covers topics that will help us be better prepared before conducting penetration tests. Preparations before a penetration test can often take a lot of time and effort, and this module shows how to prepare efficiently.

100% Completed

## Vulnerability Assessment

### Vulnerability Assessment

17 Sections Easy Offensive

This module introduces the concept of Vulnerability Assessments. We will review the differences between vulnerability assessments and penetration tests, how to carry out a vulnerability assessment, how to interpret the assessment results, and how to deliver an effective vulnerability assessment report.

64.71% Completed

## Incident Handling Process

### Incident Handling Process

9 Sections Fundamental General

Security Incident handling has become a vital part of each organization's defensive strategy, as attacks constantly evolve and successful compromises are becoming a daily occurrence. In this module, we will review the process of handling an incident from the very early stage of detecting a suspicious event, to confirming a compromise and responding to it.
